# STYLE-LINE™ FENCING

CYCLONIC FENCING | SCREENING

## STYLE AND STRENGTH

Stratco Style-Line™ fencing is an attractive fencing alternative for Australia's Northern cyclonic regions. Spaced 50mm apart, Style-Line 'Breezeway' fence panels allow a cool breeze to pass through, offsetting the endless tropical heat.

Optional horizontal or vertical panels are available in a wide range of colours, with either orientation providing visual privacy when required.

## SIMPLE INSTALLATION

Simple to install, Style-Line fencing is the ideal do-it-yourself project. Constructed from a basic post and rail frame, the fence sheets screw directly to the rails when installed vertically, or to the posts when installed horizontally.

## QUALITY FENCING

Style-Line Fencing is manufactured from durable, high quality zinc/al materials. Stratco Style-Line fencing is Building Board approved and tested for use cyclonic conditions.

**Material Specifications:** 0.42mm BMT G550 Hi-Tensile (MPa)

*Note: Deemed to comply drawing number M/812.  
Darwin Building Board approved.*

## PANEL CONFIGURATIONS

VERTICAL PANEL

HORIZONTAL PANEL

# FIXING RECOMMENDATIONS

Footing and fixing details are available for Vertical and Horizontal installation in Region C - No Shielding and Region C - Full Shielding, by visiting our website at [stratco.com.au](http://stratco.com.au)

## MAINTENANCE

Regular maintenance is essential to maintain the good looks of all Stratco steel products and to ensure you receive the maximum life-span possible in your area. Washing with clean water must be frequent enough to prevent the accumulation of dust, salts, and pollutants or any other material that will reduce the life of the product. Stratco steel products that are regularly washed by rain require no additional maintenance. No Stratco steel structure or materials are recommended for use over, or in close proximity, to swimming pools or spas. No material that retains water (such as dirt or paving sand) should be placed against the columns. Care must be taken when determining the location of Stratco steel products so that they are not placed in close contact with sources of pollution or environmental factors that could affect the life of the steel. Refer to the 'Selection, Use and Maintenance' brochure for more information.
