## Overview

We are proud to offer a unique range of truly functional gas and electric BBQs, purpose built for outdoor cooking applications. Engineered to the highest quality, and specifically designed for the harsh outdoors including boats, RV's, home and camping, there is a Sovereign model to suit any requirement.

All models are manufactured from fully welded stainless steel (no folded or sharp edges), which provides a timeless polished finish. Our high quality stainless steel burners (gas BBQs) and superior elements (electric BBQs) offer excellent tracking, coverage and a lifetime of reliable service. BBQ plates are manufactured from 3CR12 material, a superior cooking surface with excellent thermal conductivity and rust resistance. Our shaped lid features an adjustable steam relief port, enabling roasting and baking and all gas fired BBQs can be converted to a 'stove top' with the additional purchase of the BBQ Oven Wire accessory.

Sovereign gas fired BBQs combine the rotary piezo ignition and heat control into the one simple, user friendly and reliable system.

Sovereign Electric BBQs are uniquely manufactured with removable BBQ plates and removable temperature controllers and are certified to AS/NZS60335.2.9.

Built-in mounting points make the BBQs suitable for every possible installation, including custom requirements or most typical installations using our standard range of marine, RV or domestic mounting solutions.

## Key Features (All Models):

- Removable plate with handles for easy cleaning
- Baffled air intake reduces chance of gas BBQ blowing out in strong winds
- Functional removable fat tray system and sealed base compartment
- Lockable BBQ lid for easy carriage and storage
- Internal components can be quickly and easily removed for efficient cleaning and servicing
- BBQ plate features an oversized splash-back panel, minimising fat splattering into the rear vent
- Double skinned base compartment reduces heat transfer to BBQ exterior
- Adjustable steam vent on top of lid
- Wind guards on each side of BBQ plate, contains unwanted fat splatter when cooking with the lid open

## Model Selection - Marine BBQs
