Works Notice:

Price Street, Nambour

December work hours near rail bridge

Queensland Rail is continuing to prepare both sides of the rail bridge over Price Street, Nambour for the installation of bridge strike protection beams.

Night construction work is scheduled to continue until Friday 11 December 2015, weather and construction conditions permitting. Night work hours will be between 6pm and 4am Sunday to Friday.

Price Street will remain temporarily closed during these work hours. Traffic management and signage will be in place to direct road users and pedestrians around the temporary road closure. Please refer to map overleaf.

After 11 December, construction will continue during standard working hours from 7am to 5pm Monday to Saturday. There may be some night works for activities that require lane closures. We will provide advance notification of any night works required.

Residents may notice an increase in noise and vehicle movement during this time. Queensland Rail will endeavour to minimise noise disruption where possible and apologises for any inconvenience to surrounding neighbours during the works.

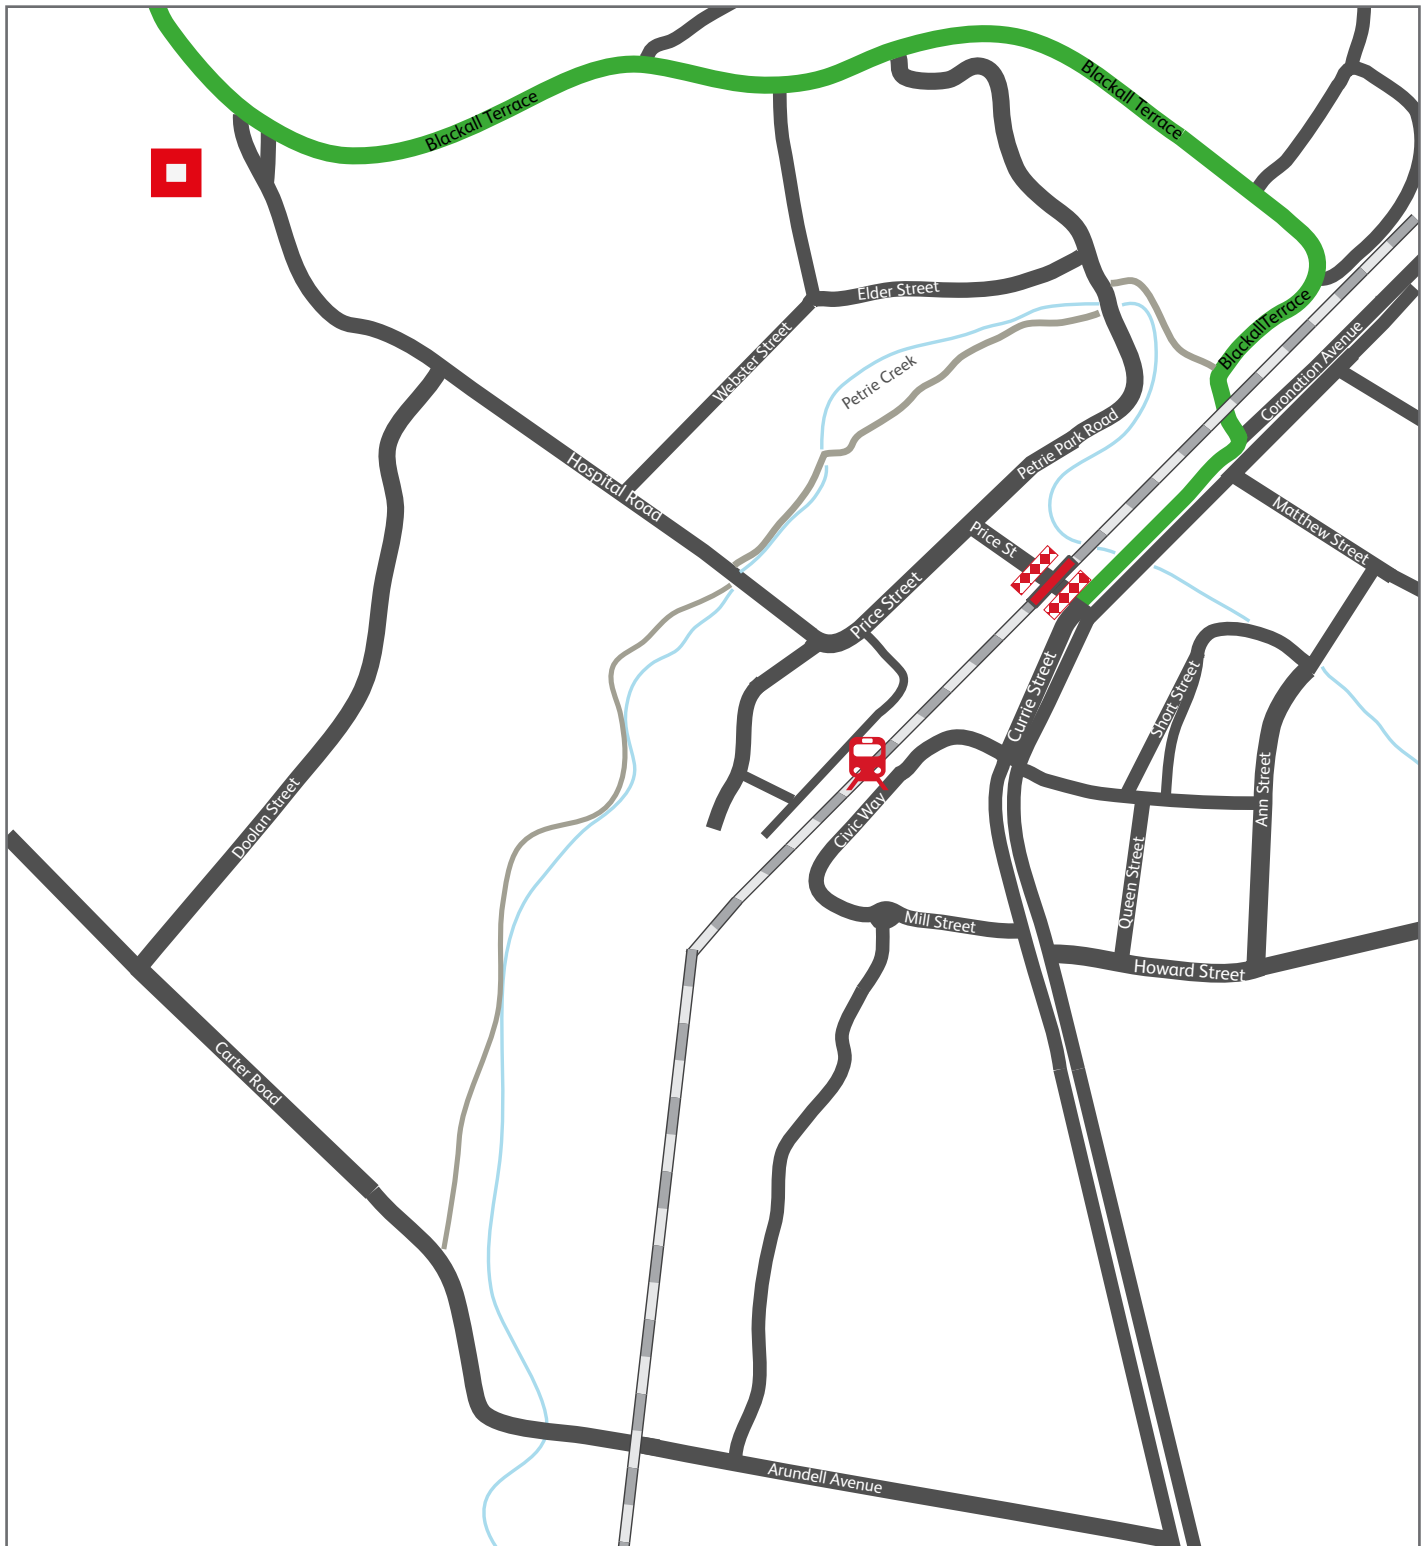

There will be no work over the Christmas period, from 22 December 2015 to 11 January 2016.

Final installation of the protection beams is scheduled for February 2016.

This installation is part of a state-wide Bridge Strike Protection program to prevent 'over-height' vehicles striking existing rail bridges, improving transport safety.
