

Works Notice

Muriel Avenue, Moorooka

Protection beam installation and night road closure

Muriel Avenue, Moorooka will be temporarily closed in the eastbound direction on **Monday 8 August 2016 between 8pm and 5am**, weather and construction conditions permitting. The westbound direction will remain open during this time.

The road closure is required to safely install the protection beam on the western approach to the rail bridge over Muriel Avenue. This work is being done at night when traffic volumes are reduced.

Residents may notice an increase in vehicle movement and noise from machinery and construction activities during this time. Traffic management and signage will be in place to direct road users and pedestrians around the temporary road closure.

Queensland Rail will endeavour to minimise noise disruption where possible and apologises for any inconvenience during the works.

This installation is part of a state-wide Bridge Strike Protection program to prevent 'over-height' vehicles striking existing rail bridges, improving transport safety.

Once the protection beam is installed, the **maximum clearance height for vehicles will still be 3.8 metres.**

It is essential that motorists are aware of the height of their vehicles and follow the warning signs.

For information call **13 16 17 (8am - 5pm Monday - Friday)** or email customerfeedback@qr.com.au
